SUMMARY

With over 9 years of experience in Python development, specializes in healthcare applications to enhance patient outcomes. Expertise in developing scalable applications using Django, AWS, and Docker. A key achievement includes leading a team to reduce processing time by 30%, improving system efficiency and user satisfaction.

EXPERIENCE

Senior Python Developer

MedSys Technologies

- 06/2026 - Present Seattle, WA
- Developed scalable Python applications, reducing processing time by 30% and enhancing system efficiency.
- Collaborated with a team to integrate Django applications with cloud solutions, boosting deployment speed by 25%.
- Implemented advanced data protection measures, ensuring compliance with healthcare standards and reducing security breaches by 40%.
- Led Python code reviews, improving code quality standards and reducing bugs by 20% across the team.
- Facilitated cross-functional collaboration with front-end developers, enhancing application UI and UX.

Python Developer

HealthLink Networks

- 03/2021 - 05/2026 Redwood City, CA
- Optimized database queries using PostgreSQL, cutting data retrieval time by 35%.
- Implemented RESTful APIs with Flask that increased interoperability with external systems by 50%.
- Employed Docker and Kubernetes for efficient application containerization, reducing deployment issues by 45%.
- Enhanced team productivity through collaborative sprints with engineers and product managers, resulting in a 20% project completion acceleration.

Software Engineer

CareTech Innovations

- 06/2017 - 02/2021 Mountain View, CA
- Engineered backend systems with Python that improved data processing efficiency by 50%.
- Developed innovative solutions for data analytics, helping clients achieve better data insights by 30%.
- Collaborated effectively with UX designers to deliver user-friendly application interfaces, resulting in a 25% increase in user satisfaction.
- Introduced best practices for code writing and application design, decreasing code maintenance time by 20%.

PROJECTS

Open Source Healthcare API Project

Developed an open-source API for healthcare data integration, improving interoperability across systems. GitHub: github.com/owenhealthapi

Patient Data Visualization Tool

Built a data visualization tool for patient records, enhancing data analysis capabilities by 40%. GitHub: github.com/owenvisualization

EDUCATION

Bachelor of Science in Computer Science

San Jose State University

01/2013 - 01/2017 San Jose, CA

KEY ACHIEVEMENTS

- Reduced Processing Time by 30%**
Led a team to improve Python application efficiency, resulting in reduced processing time and enhanced system performance.
- Increased Deployment Speed by 25%**
Successfully integrated cloud solutions with applications, increasing deployment speeds and reducing time to market.
- Improved Data Retrieval Efficiency**
Optimized database operations, achieving a 35% reduction in data retrieval times and improved user experience.
- Enhanced Code Quality and Reduced Bugs**
Pioneered code review standards that minimized bugs by 20%, boosting software reliability.

SKILLS

Python	Django	Flask	AWS
Docker	PostgreSQL
